

December 2015

Do you need a cage or supplies for your furry friends? The rescue has a selection of cages, hammocks, litter boxes, igloos and much more. Homemade dry food and litter are also readily available. The rescue asks for donations for these supplies which help provide more rats with a second chance.

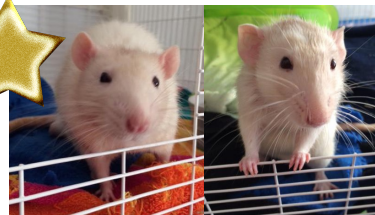

These 10 boys are 7-week-old light tan-capped rats (4 of them are dumbos). All are friendly. There is also a mom and 2 adult boys that came with this group. Contact us for more information!

Baez is the mother of the 10 rescued babies. She is a spayed rat who is inquisitive, but needs an experienced owner who can help her become comfortable with being handled.

Meet Bing and Crosby. They are black capped males. Crosby (left) has some black spots on his back. We are guessing they are about a 1 1/2 years old. They are easy to handle. They were found at a Petco where a family had left them.

Hooch and Turner are estimated at seven months old. Hooch has dumbo ears and he is a huge, gorgeous, curious boy. He will need help getting used to being handled. Please contact us for more information!

Minoh is a dumbo tan-capped boy and currently lives with his brother Newt. He is very friendly and likes shoulder rides. Wouldn't you like to meet him?

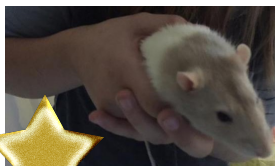

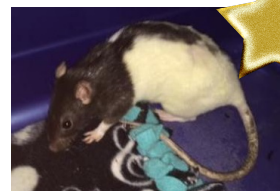

Newt is the 8 week old brother of Minoh. Newt is a friendly and nice boy. Loves all food. Please inquire with any questions.

Hello everyone, meet Delaney! She is a black hooded female. She is about 4-6 months old. She will be spayed. She was found by a kind gentleman in Gilbert. She had been living in his grill! What a special girl who has been given a second chance at life.

Meet Cosmo. He is 9 months old. He is neutered hooded rat. We are in the process of re-introducing him to brother Astro. We are hoping they can be adopted together. They are both nice boys who like to be held by people.

Elby is a dark tan-capped rat rescued from Prescott Valley who is currently under treatment for a likely ear infection with an improving head tilt. He is about 5 months old. He is bonded with Stephie, a black-capped, spayed female who is approximately 6 months old.

Hello everyone meet Astro. He is about 9 months old. He is neutered hooded rat. We are in the process of re-introducing him to brother Cosmo. Currently we are hoping they can be adopted together. They are both nice boys who like to be held by people.
